-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claims 1-11 is withdrawn in view of the new reference(s) to Morizumi et al. (EP1 014 302), of record. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morizumi et al. (EP 1 014 302).

Regarding Claims 1-11, Morizumi et al. show in Fig. 4, a single/sole loop antenna 10 and method for forming thereof, a support 11, the loop 13 having two contact zones 17a and 17c defining capacitor plates, the capacitor is mounted and electrically connected in parallel with the loop 13. The conductors forming the structure are printed in steps with conductive ink, as set forth in Claims 6-10. It would have been obvious to the skilled artisan to employ gravure printing to define all conductors and insulators (e.g., 14 and 17b).

Regarding Claims 2 and 3, frequency of operation is an obvious one to the skilled artisan. Regarding Claims 4, the thickness is less than 10 micrometers, i.e., 2

micrometers. The chip 12, as recited in Claims 5 and 10, is shown connected as claimed.

4. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c).

The only drawing in the file is that in the Priority Document and PCT copy of WO 2004/012299.

No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
